Dear Valued Customer

Re: Conflict Minerals

Cuyahoga Molded Plastics is a quality manufacturer of thermoset molding compounds and molded parts. As directed by the Dodd-Frank Act of 2010, reporting requirements apply to manufacturers of products containing conflict minerals; tin, tantalum, tungsten and gold. We do not utilize any of the four conflict minerals in our material compounds nor in any of the parts molded that we supply to you.

With respect to the rule's requirements for reporting conflict minerals, our company will comply with SEC requirements, and monitor its relationships with its suppliers to ensure continued compliance. We appreciate being able to address your concerns and for the opportunity to be your supplier.

Respectfully,

Edward J Zalar

CEO
