Dear Valued Customer

Re: RoHS

Cuyahoga Molded Plastics Corp (CMP) molding compounds are manufactured with production processes that do not intentionally add or contain banned substances as outlined in the Directive (EU) 2015/863 (amending Annex II to EU Directive 2011/65/EU). However, these substances may only be present as adventitious impurities in the raw materials at levels which can not be avoided.

With the information provided to us by our suppliers for raw materials used in our compounds, we believe the concentration levels are not present or are below the maximum concentration value permitted, of 0.1% by weight in homogeneous materials, and 0.01% for cadmium

Where products are molded by CMP, from customer specified or customer supplied materials, inserts or any other aspect beyond our control, CMP is not able to control the existence of banned substances, and is unable to declare the materials compliance with RoHS directives.

Respectfully,
Edward J. Zalar
CEO
